

EDUCATION

BTech - Computer Science and Artificial Intelligence	Plaksha University, Mohali	2023 – Present
12th - Karnataka Board	St. Joseph’s Pre University College, Bengaluru	2022
10th - CBSE Board	Vidya Vihar Residential School, Purnea	2020

EXPERIENCE

Software Developer Intern Mieraki Digital Solutions	Jun 2026 – Jul 2026
- Engineered fleet optimization algorithms using Google OR-Tools to minimize empty return trips and improve truck utilization - Implemented internal tools for dispatch and trip management, streamlining daily operations for a 50+ vehicle fleet - Designed interactive dashboards using Grafana to monitor fleet performance and transportation costs - Developed a customer support portal to track issues and automate resolution workflows	
Software Intern Upliance	May 2024 – Jul 2024
- Automated the migration and validation of millions of telemetry records to AWS - Integrated Google Cloud Speech-to-Text models into an Android application, enabling seamless voice-controlled user actions - Configured Firebase Cloud Messaging to dispatch real-time push notifications, keeping users informed of asynchronous app actions - Created product usage dashboards by deploying PostHog locally, visualizing internal product telemetry and user interactions	

PROJECTS

LLM-in-the-Loop Continuous Control Reinforcement Learning	Jan 2026 – Apr 2026
- Built a 32-environment parallel simulator for LLM-based drone navigation - Integrated Qwen 1.5B with PyBullet for closed-loop continuous control - Optimized concurrent inference with vLLM and AsyncIO, identifying LLM latency as the bottleneck - Improved goal success from 3.7% to 52.2% through GRPO-based policy training	
E-Yantra International Competition Organized by IIT Bombay	Sep 2024 – Jan 2025
- Programmed a RISC-V CPU in Verilog as part of the competition - Designed and integrated a UART module for serial communication - Implemented FPGA clock-frequency scaling from 50 MHz to 1 MHz and 500 Hz, and developed a configurable PWM generator - Debugged and validated hardware modules on FPGA boards	
Bridge Inter University Hackathon Winner	Mar 2024
- Built a data labeling workflow platform using Node.js to connect AI companies with women workers - Won the Grand Challenges track, recognized for societal impact	

POSITIONS OF RESPONSIBILITY

Student Representative Disciplinary Committee	Apr 2025 – Present
- Represented student interests as an active member of the college disciplinary committee - Ensured fair and balanced proceedings during disciplinary hearings - Facilitated communication between students and the administration on disciplinary matters	
Member LEAP AI Club	Aug 2024 – Jan 2025
- Organized and hosted an AI-themed quiz as Quizmaster, engaging over 50 participants - Showcased the club’s initiatives at a college tech event to promote student participation - Led discussions on the latest AI developments during regular club meetings	

SKILLS

- Programming Languages:** Python, C, C++, JavaScript, Verilog
- Frameworks & Libraries:** PyTorch, Node.js, Express, Google OR-Tools, vLLM, PyBullet
- Tools & Cloud:** AWS (EC2), Google Cloud, Docker, Git, Firebase, Hasura, Grafana, PostHog, Linux, Postman

ACHIEVEMENTS

Winner, Inter-University Codebreakers Competition	2024 – 2025
Winner, Intra-University Capture the Flag (CTF)	2023 – 2024
4th Place, Intra-University Stock Trading Simulation	2023 – 2024
Awarded <i>Spirit of Plaksha</i> — college honor for excellence in values and impact	2024 – 2025
